

ARTHRO Mentor™

VR Training Simulator for Knee and Shoulder Arthroscopic Procedures

The ARTHRO Mentor™ is an ideal addition to traditional training techniques, honing basic skills, reducing training time and considerably improving the learning curve of the complex arthroscopic surgery techniques.

Hardware includes:

- Detailed realistic anatomical models
- Realistic surgical instruments adapted for use with the simulator
- PHANTOM® haptic device

Software includes:

- Training Curricula including tasks and full surgical procedure cases
- Statistic and graphic data for training assessment

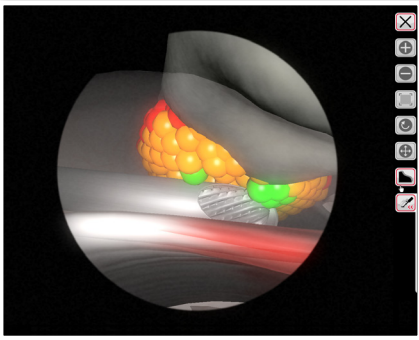

ARTHRO Mentor™

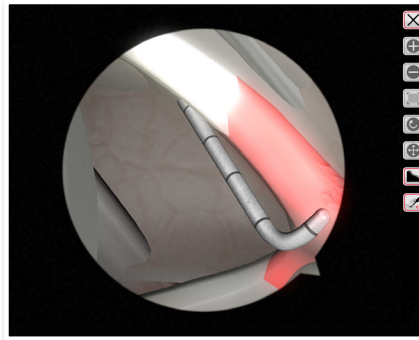

ARTHRO Mentor™ Available modules include:

- General arthroscopic skills
- Shoulder diagnostic procedures
- Knee diagnostic procedures
- Shoulder therapeutic procedures
- Knee therapeutic procedures

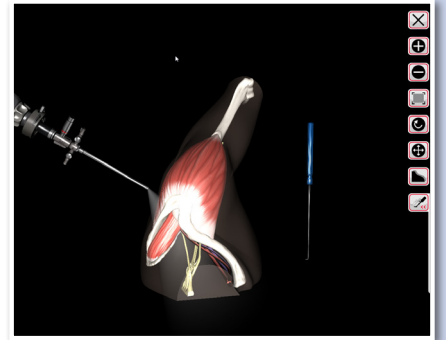

Acromioplasty

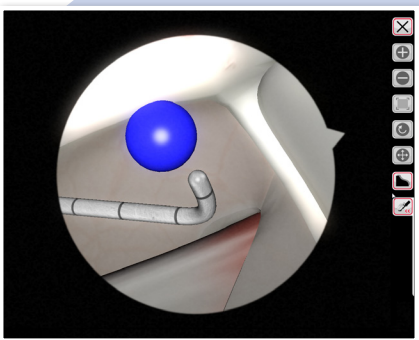

Glenohumeral

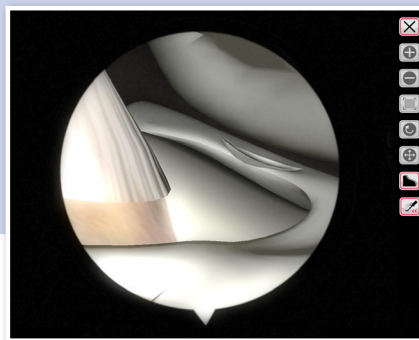

Anatomy Review

Basic Skills

Discoid Meniscus

Menisectomy
