

SimposiaSM
Communities for Physicians

Simposia is an online network of communities where physicians can share and discuss clinical procedures and videos anytime, anywhere.

These shared cases create a trusted knowledge base for learning and collaboration.

Women's Health Community is a case-based resource that goes beyond traditional education to conveniently offer the information you need, when you need it. Share your cases and videos with colleagues, mentors and worldwide experts, as well as review and comment on their submissions.

Simposia members can perform the following:

Cases

Share and view procedural cases supplemented with videos, images and presentations

Colleagues

Collaborate with colleagues based on specialty, residency programs and professional associations

Events

Keep track of important events and attendance in a community event calendar

Groups

Create groups within a community based on shared interests

Stat Consult

Secure messaging with select colleagues with instant notification and attachments

Activity Feed

Easily view a snapshot of recent activities across all your communities

Polls

Create and answer polls to gauge community opinions on various topics, including cases

Education

Locate relevant educational content; track enrollment, progress and certification

Messaging

Securely communicate with other members

Discussions

Join forums with engaging discussions and topics

Simposia Women's Health Mentor Series

Starting on November 27th and on a bi-weekly basis, Simposia will post a case by a leading physician on a topical surgical technique or medical practice. Not only will these experts share their cases and videos, they will be available to respond to your questions all week.

<p>Managing the Large Fibroid Uterus Laparoscopically Thomas Lyons</p>		<p>Manipulating and morcellating a large uterus can be difficult. In this case, you will see, in it's entirety, how Dr. Lyons handles these challenges and the equipment that he uses. Dr. Lyons is currently practicing in Atlanta, GA and is a true leader in the field of minimally invasive gynecology.</p>
<p>Pelvic Adhesion Management Camran Nezhat</p>		<p>Watch as Dr. Nezhat demonstrates the methodic takedown of bowel and pelvic sidewall adhesions using various techniques and equipment.</p>
<p>Tissue Morcellation Thomas Lyons</p>		<p>Dr. Lyons uses several different techniques for safe and complete morcellation of the fibroid uterus. Tune in to learn how to become more efficient at this sometimes tedious task and decrease your operative time.</p>
<p>Refining LIH Techniques Thomas Lyons</p>		<p>Performing a laparoscopic intrafascial hysterectomy can be tricky. Particularly down at the cervical canal. See how Dr. Lyons takes down the cervix and closes the defect.</p>
<p>Robotics in Gynecology William F. von Almen II</p>		<p>Dr. Lyons provides us with some gold standard cases involving a large fibroid uterus and demonstrates some standard robotic techniques.</p>
<p>Laparoscopic Myomectomy Techniques and Tricks Resad Paya Pasic</p>		<p>Dr. Pasic provides us with an elegant demonstration of laparoscopic myomectomy removal and a beautiful closure of the uterine defect.</p>
<p>Management of Severe Endometriosis Camran Nezhat</p>		<p>Dr. Nezhat needs no introduction. He will demonstrate using multiple energy sources to remove endometriosis and dissection of pelvic sidewall lesions for complete removal.</p>
<p>New Advances in Hysteroscopy Linda Bradley</p>		<p>Dr. Bradley showcases her hand-picked hysteroscopic videos and discusses the best ways to maneuver in difficult situations.</p>
<p>A True Laparoscopic Paravaginal Repair Technique Resad Paya Pasic</p>		<p>Paravaginal repair via the laparoscope can be difficult. It is imperative to identify all of the pelvic supporting structures properly for a lasting repair. This case will demonstrate such a repair.</p>
<p>Surgical Management of Chronic Pelvic Pain Camran Nezhat</p>		<p>Pelvic pain has many different etiologies but sometimes the only treatment left is surgery. Dr. Nezhat demonstrates his process for treating pelvic pain with organic causes.</p>
<p>Surgical Challenges</p>		<p>To be announced.</p>
<p>Live Simposia</p>		<p>To be announced.</p>
