

# Upgrade Your Camera Skills

## Introducing the NEW LAP Camera Pro

Upgrade your LAP Mentor's camera and experience a new world of operational realism.

- True-to-life camera experience
- Use of angled optics
- Better team training experience
- Ability to use zoom and focus dials\*
- Advanced procedural camera features such as white balance and light intensity\*

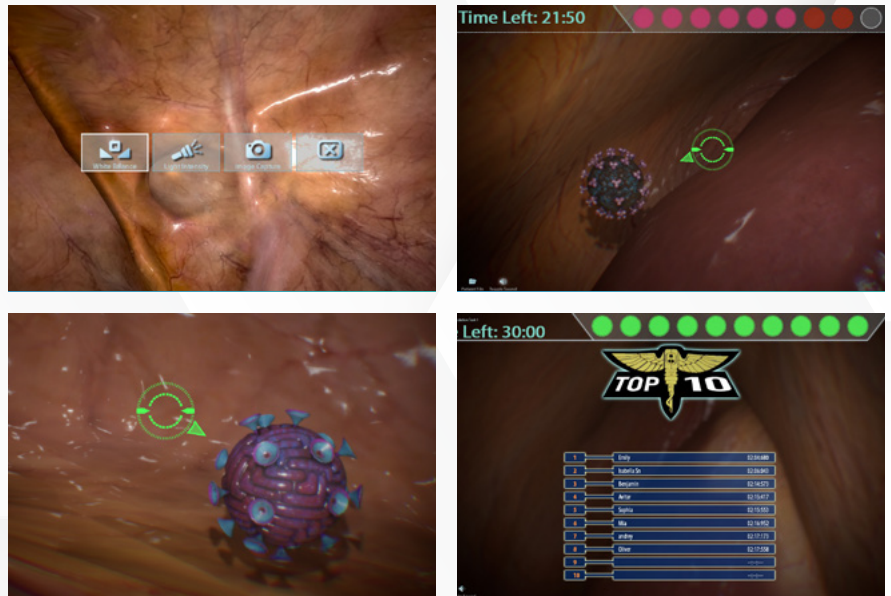

\* Available for use in select modules with more coming soon

## In addition to the NEW Camera Pro and at no additional cost, receive the new Camera Manipulation Module.

Practice and master the fundamental skills of camera navigation and angled optics in a safe and engaging environment.

- 4 tasks to acquire camera navigation skills such as camera holding, maintaining, and controlling the horizon, angled optics usage, and spatial awareness
- Become familiar with straight and 30° angled camera navigation
- Fun and engaging experience
- Top-10 hall of fame scores for best performances to encourage excellence and greater skill
- 2 additional tasks dedicated to the use of focus and zoom would be available in a future update

The Simbionix LAP Mentor is the most sophisticated and adopted laparoscopic training simulator with 1,300+ systems installed worldwide. Surgical Science continues to invest in product development to ensure that learners utilize the most current technology available. This includes the addition of this new, realistic camera with superior controls.
