- Hysteroscopy Essential Skills
- Diagnostic Hysteroscopy
- Polypectomy
- Myomectomy Removal
- Endometrium Ablation
- Advanced Resection
- Essure® permanent birth control system
- Morcellation

**3DSYSTEMS®**

3D Systems pioneered healthcare solutions that enhance quality-of-life through the use of 3D printing, surgical planning and personalized medical technologies. We are dedicated to helping medical professionals train for, plan, practice and perform complex medical procedures and achieve better patient outcomes.

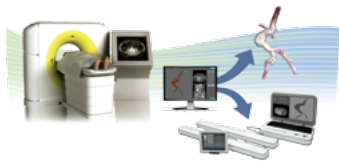

3D Systems' Symbionix simulation products provide a complete solution for training programs with a full array of simulators, PROCEDURE Rehearsal Studio™ for case rehearsal and to create 3D printed personalized anatomical models, and MentorLearn™ for simulator management.

The company is committed to building an end-to-end Digital Thread for Personalized Surgery. We develop true patient-specific healthcare solutions, one-by-one or at scale, designed to change the future of personalized medicine.

Our team cooperates with physicians on a regular basis to produce the most reliable and effective solutions for its customers.
